TUMOR TISSUE REGISTRY

“GENERAL PATHOLOGY”

Study Cases, Subscription A

March, 2004

California Tumor Tissue Registry
c/o: Department of Pathology and Human Anatomy
Loma Linda University School of Medicine
11021 Campus Avenue, AH 335
Loma Linda, California 92350
(909) 558-4788
FAX: (909) 558-0188
E-mail: cttr@linkline.com
Web page: www.cttr.org
Web site & Case of the Month: www.cttr.org

Target audience:

Practicing pathologists and pathology residents.

Goal:

To acquaint the participant with the histologic features of a variety of benign and malignant neoplasms and tumor-like conditions.

Objectives:

The participant will be able to recognize morphologic features of a variety of benign and malignant neoplasms and tumor-like conditions and relate those processes to pertinent references in the medical literature.

Educational methods and media:

Review of representative glass slides with associated histories.

Feedback on consensus diagnoses from participating pathologists.

Listing of selected references from the medical literature.

Principal faculty:

Weldon K. Bullock, MD

Donald R. Chase, MD

CME Credit:

Loma Linda University School of Medicine designates this continuing medical education activity for up to 2 hours of Category I of the Physician's Recognition Award of the American Medical Association.

CME credit is offered for the subscription year only.

Accreditation:

Loma Linda University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians.

Contributor: John McGill, M.D.
Pasadena, CA

Case No. 1 - March 2004

Tissue from: Uterus

Accession #29774

Clinical Abstract:

Following work-up for vaginal bleeding, this 56-year-old female was found by CT scan to have a large necrotic uterine mass.

Gross Pathology:

The 654 gram uterus contained a 20.0 cm hemorrhagic endometrial tumor extending through the myometrium to the serosa.

Contributor: Usha Garg, M.D.
Oxnard, CA

Case No. 2 - March 2004

Tissue from: Left breast

Accession #29776

Clinical Abstract:

This 25-year-old female presented with a mass in her left breast.

Gross Pathology:

The 5.0 x 4.0 x 3.0 cm ovoid mass was composed of fairly uniform gray-white tissue without cyst-like spaces.

Contributor: Alexander K. Lyster, M.D.
Victoria, TX

Case No. 3 - March 2004

Tissue from: Right wrist

Accession #29705

Clinical Abstract:

Radiographs showed a mass in the distal right radius of this 24-year-old female. [Radiographs are not available for review.]

Gross Pathology:

The multiple fragments of shaggy papillary to nodular tan-gray tissue measured 10.0 x 9.0 x 5.0 cm.

Contributor: Jozef Kollin, M.D.
Lakewood, CA

Case No. 4 - March 2004

Tissue from: Right great toe

Accession #29813

Clinical Abstract:

Because of discomfort and pain upon ambulation, this 45-year-old male asked to have a soft tissue mass was removed from his right great toe.

Gross Pathology:

The 7.0 x 6.0 x 2.0 cm soft tissue mass had an amorphous, crumbling yellow-white cut surface with calcifications.

Contributor: Steve Romansky, M.D.
Long Beach, CA

Case No. 5 - March 2004

Tissue from: Adrenal gland

Accession #29756

Clinical Abstract:

Following therapy for a left adrenal mass, this six year old female underwent resection of the tumor.

Gross Pathology:

The 27 gram, 5.0 x 3.5 x 2.5 cm triangular shaped, soft pink specimen showed a tan-pink solid, and focally lobulated tumor surrounded by a thin rim of yellow adrenal cortex.

Contributor: Timothy Cloherty, M.D.
Santa Barbara, CA

Case No. 6 - March 2004

Tissue from: Left adrenal

Accession #29680

Clinical Abstract:

This 49-year-old female was found to have hyperaldosteronism and a left adrenal mass was resected.

Gross Pathology:

The 41 gram adrenal gland contained a 4.5 x 3.5 x 4.5 cm a variegated light and dark red, focally lobular tumor with central hemorrhage and chalky red necrosis.

SPECIAL STUDIES:

Chromogranin

negative

S100

negative

CAM5.2

positive in a dot-like pattern

Contributor: Jozef Kollin, M.D.
Lakewood, CA

Case No. 7 - March 2004

Tissue from: Retroperitoneum

Accession #29807

Clinical Abstract:

This 75-year-old female presented with a retroperitoneal perinephric mass.

Gross Pathology:

An irregular shaped piece of fatty tissue was lobular and yellow with grey areas of increased consistency.

SPECIAL STUDIES:

HMB45 positive

Contributor: Xuedong Wang, M.D.
Pasadena, CA

Case No. 8 - March 2004

Tissue from: Thymus

Accession #29809

Clinical Abstract:

A chest x-ray right prior to total hip replacement in this 54-year-old female smoker demonstrated an abnormality in the mediastinum. CT scan confirmed a mass in the superior aspect of the anterior mediastinum. A thymectomy was performed.

Gross Pathology:

The well-circumscribed, encapsulated soft tan lesion weighed 110 grams and measured 8.0 x 6.5 x 4.0 cm. Sectioning revealed small cystic spaces ranging from 0.3 to 1.5 cm.

**Contributor: W. Leonard Taylor, M.D.
Redlands, CA**

Case No. 9 - March 2004

Tissue from: Bowel

Accession #29806

Clinical Abstract:

Complaining of stomach flu, with vomiting, shakes, chills, sweats and up to 103 degree temperature, this 44-year-old female was found to have an abdominal mass, which was removed.

Gross Pathology:

A 20.0 segment of small bowel was distorted by a 155 gram, 14.5 cm in maximum diameter mass. The mass was located within the bowel wall and elevated, but did not ulcerate, the mucosa. It extended into adjacent mesentery to form another, partially cystic, mass.

Case No. 10 - March 2004

Tissue from: Abdominal wall

Accession #29567

Clinical Abstract:

Several years after a total hysterectomy for cancer, this 61-year-old female underwent a ventral hernia repair. Two years later she developed a mass in the region of the marlex mesh placed at the time of the hernia repair.

Gross Pathology:

Within the 437 gram, 13.5 x 12.0 x 6.0 cm specimen was a 10.0 x 10.0 x 5.5 cm circumscribed fibrous nodule with a glistening whorled cut surface.

SPECIAL STUDIES:

FILE DIAGNOSES

CTTR Subscription A

March, 2004

Case 1:

Endometrial ("Endometrioid") adenocarcinoma, uterus
T-82000, M-83803

Case 2:

Low grade phyllodes tumor, breast
T-04000, M-90213

Case 3:

Giant cell tumor, radius
T-Y8600, M-92501

Case 4:

Gouty tophus, hallux
T-Y9710, M-55070

Case 5:

Neuroblastoma with therapy-associated maturation (ganglioneuroblastoma), adrenal
T-93000, M-94903

Case 6:

Adrenal cortical carcinoma, adrenal
T-93000, M-83703

Case 7:

Angiomyolipoma, peri-nephric region
T-Y4600, M-88600

Case 8:

Thymoma, thymus
T-85800, M-85800

Case 9:

Gastrointestinal stromal tumor (GIST), bowel
T-64000, M-96103

Case 10:

Abdominal fibromatosis (desmoid tumor)
T-Y4100, M-76100

Alameda (Alameda County Medical Center) - Endometrioid adenocarcinoma
Arcadia (Garfield Medical Center) - Clear cell adenocarcinoma
Bakersfield - Endometrioid adenocarcinoma
Baldwin Park (Kaiser Permanente) - Endometrioid adenocarcinoma (2); Endometrial carcinoma (deeply invasive) (1)
Fontana (Kaiser Permanente) - Endometrioid adenocarcinoma
Howard/Fremont - Endometrioid carcinoma, moderately differentiated
Irvine (UC Irvine Residents) - Poorly differentiated adenocarcinoma
Laguna Beach (South Coast Medical Center) - Grade I, endometrial adenocarcinoma
Long Beach - Papillary serous adenocarcinoma (6); High-grade endometrioid carcinoma (1)
Monterey (Community Hospital of Monterey Peninsula) - Endometrioid adenocarcinoma, grade 3 (2); Endometrial adenocarcinoma, endometrioid, grade 2 (2)
Mountain View (El Camino Pathology Group) - Endometrial adenocarcinoma, FIGO 2 (2)
Sacramento (UC Davis Medical Center) - Endometrioid carcinoma, grade II
San Diego (Naval Medical Center) - Moderately differentiated endometrioid adenocarcinoma
San Francisco (San Francisco General Hospital) - Carcinosarcoma
Santa Barbara (Santa Barbara Cottage Hospital) - Adenocarcinoma, endometrioid type, grade II
Santa Rosa (Santa Rosa Memorial Hospital) - Endometrioid adenocarcinoma (2); Poorly focally differentiated endometrial endometrioid adenocarcinoma (1)
Ventura - Endometrioid endometrial adenocarcinoma
Alaska (Alaska Native Medical Center) - Endometrioid endometrial adenocarcinoma, FIGO grade 2
Arizona (Maryvale Medical Center) - Serous carcinoma, endometrium
Colorado (Evergreen) - Anaplastic carcinoma/adenocarcinoma
Colorado (Lutheran Medical Center) - Papillary serous carcinoma
Florida (Baptist Hospital) - Endometrioid adenocarcinoma (3); Endometrial carcinoma, FIGO I-II (1); Endometrial carcinoma (1)
Florida (Ocala) - Endometrial adenocarcinoma
Florida (Tallahassee) - Adenocarcinoma
Florida (Winter Haven Hospital) - Carcinosarcoma (2)
Illinois (Burr Ridge) - Villoglandular endometrial carcinoma
Illinois (Evanston Hospital) - Endometrioid adenocarcinoma
Indiana (Ball Memorial Hospital) - Endometrioid adenocarcinoma
Indiana (Howard Community Hospital) - Endometrial carcinoma
Kansas (Kansas University Medical Center) - Endometrial adenocarcinoma, endometrioid type, FIGO II, nuclear grading II (3)
Maryland (National Naval Medical Center) - Endometrioid adenocarcinoma
Maryland (Johns Hopkins Hospital Residents) - Endometrioid adenocarcinoma, FIGO II
Massachusetts (Berkshire Medical Center) - Endometrioid adenocarcinoma, FIGO grade III
Massachusetts (New England Medical Center Residents) - Endometrial adenocarcinoma, endometrioid type
Minnesota (Fairview Southdale Hospital) - Endometrioid adenocarcinoma, villoglandular type
New Jersey (Overlook Hospital) - Adenocarcinoma, poorly differentiated consistent with neuroendocrine differentiation
New York (Long Island Jewish Medical Center) - Poorly differentiated endometrioid adenocarcinoma
New York (Nassau University Medical Center) - Poorly differentiated adenocarcinoma with clear cell feature
New York, New York - Grade 3, endometrioid carcinoma of the endometrioid -- ? clear cell features
New York (New York Presbyterian Cornell Residents) - Endometrioid carcinoma
North Carolina (Mountain Area Pathology) - Endometrial adenocarcinoma (1); Endometrioid adenocarcinoma (1); Endometrial adenocarcinoma consistent with poorly differentiated tumor at serosal surface (1); Poorly differentiated endometrioid carcinoma (1)
Ohio (Medical College of Ohio) - Moderately differentiated adenocarcinoma, endometrioid type with squamous metaplasia (1)
Oklahoma (Tulsa) - Endometrioid type adenocarcinoma, poorly differentiated
Pennsylvania (Allegheny General Hospital) - Poorly differentiated endometrial carcinoma
Pennsylvania (Conemaugh Memorial Medical Center) - Endometrial carcinoma
Pennsylvania (Drexel University College of Medicine) - Endometrial carcinoma, endometrioid type
Pennsylvania (Lehigh Valley Hospital) - Endometrial adenocarcinoma

Pennsylvania (Mount Nittany Medical Center) - Endometrial adenocarcinoma
Pennsylvania (York Hospital) - Endometrial adenocarcinoma, endometrioid type, FIGO 3(4); Endometrial adenocarcinoma (2)
Puerto Rico (University of Puerto Rico) - Endometrial carcinoma, endometrioid type, FIGO grade 2
Rhode Island (RI Hospital Residents) - Endometrioid carcinoma
Texas (Lubbock) - Papillary serous carcinoma
Texas (Propath Associates) - Endometrial adenocarcinoma (2)
Texas (San Antonio) - Endometrial adenocarcinoma, endometrioid type
Texas (Scott & White Memorial Hospital) - Invasive endometrioid adenocarcinoma
Wisconsin (Meriter Hospital) - Endometrioid adenocarcinoma
Wyoming (Greenbrier Valley Medical Center) - Endometrial adenocarcinoma, endometrioid
Australia (North Queensland Pathology) - Endometrioid endometrial adenocarcinoma
Australia (Royal Prince Alfred Hospital) - Endometrioid adenocarcinoma, grade 2
Canada (Foothills Medical Center) - Endometrioid adenocarcinoma
Hong Kong (Hong Kong Baptist Hospital) - Clear cell carcinoma
Italy (Naples) - Grade 3 endometrioid adenocarcinoma
Saudi Arabia - Endometrioid adenocarcinoma, uterus

Case 1 – Diagnosis:

Endometrial (“Endometrioid”) adenocarcinoma, uterus
T-82000, M-83803

Case No. 5, Accession No. 29756

March 2004

- Alameda (Alameda County Medical Center) - Ganglioneuroblastoma, treated
Arcadia (Garfield Medical Center) - Composite pheochromocytoma
Bakersfield - Ganglioneuroma
Baldwin Park (Kaiser Permanente) - Ganglioneuroma vs. matured neuroblastoma (3)
Fontana (Kaiser Permanente) - Ganglioneuroblastoma
Howard/Fremont - Ganglioneuroblastoma, grade I
Irvine (UC Irvine Residents) - Ganglioneuroblastoma
Laguna Beach (South Coast Medical Center) - Ganglioneuroma
Long Beach - Ganglioneuroma, status post therapy (7)
Monterey (Community Hospital of Monterey Peninsula) - Ganglioneuroma
Mountain View (El Camino Pathology Group) - Ganglioneuroblastoma (1); Ganglioneuroma (1)
Sacramento (UC Davis Medical Center) - Ganglioneuroma
San Diego (Naval Medical Center) - Ganglioneuroblastoma, intermixed
San Francisco (San Francisco General Hospital) - Ganglioneuroma
Santa Barbara (Santa Barbara Cottage Hospital) - Ganglioneuroblastoma
Santa Rosa (Santa Rosa Memorial Hospital) - Ganglioneuroma (3)
Ventura - Ganglioneuroma
Alaska (Alaska Native Medical Center) - Ganglioneuroblastoma (2); Ganglioneuroma (1)
Arizona (Maryvale Medical Center) - Ganglioneuroblastoma, intermixed
Colorado (Evergreen) - Ganglioneuroma
Colorado (Lutheran Medical Center) - Ganglioneuroma
Florida (Baptist Hospital) - Composite pheochromocytoma with ganglioneuroma (1); Ganglioneuroblastoma (3); Ganglioneuroblastoma, imperfect type (1)
Florida (Ocala) - Ganglioneuroblastoma (neuroma)
Florida (Tallahassee) - Ganglioneuroblastoma
Florida (Winter Haven Hospital) - Ganglioneuroblastoma (2)
Illinois (Burr Ridge) - Ganglioneuroma
Illinois (Evanston Hospital) - Ganglioneuroma
Indiana (Ball Memorial Hospital) - Ganglioneuroblastoma
Indiana (Howard Community Hospital) - Pheochromocytoma
Kansas (Kansas University Medical Center) - Ganglioneuroblastoma (3)
Maryland (National Naval Medical Center) - Ganglioneuroblastoma, intermixed
Maryland (Johns Hopkins Hospital Residents) - Maturing neuroblastoma s/p chemotherapy
Massachusetts (Berkshire Medical Center) - Treated ganglioneuroblastoma
Massachusetts (New England Medical Center Residents) - Ganglioneuroblastoma

Minnesota (Fairview Southdale Hospital) - Ganglioneuroma, favor treatment inclined maturation of neuroblastoma
New Jersey (Overlook Hospital) - Ganglioneuroma
New York (Long Island Jewish Medical Center) - Ganglioneuroblastoma
New York (Nassau University Medical Center) - Ganglioneuroblastoma
New York, New York - Ganglioneuroblastoma, very few neuroblasts (differentiating secondary to therapy)
New York (New York Presbyterian Cornell Residents) - Ganglioneuroma
North Carolina (Mountain Area Pathology) - Ganglioneuroblastoma (4)
Ohio (Medical College of Ohio) - Ganglionuroblastoma
Oklahoma (Tulsa) - Ganglioneuroblastoma
Pennsylvania (Allegheny General Hospital) - Ganglioneuroblastoma
Pennsylvania (Conemaugh Memorial Medical Center) - Ganglioneuroblastoma
Pennsylvania (Drexel University College of Medicine) - Ganglioneuroma
Pennsylvania (Lehigh Valley Hospital) - Ganglioneuroma
Pennsylvania (Mount Nittany Medical Center) - Ganglioneuroblastoma, adrenal gland
Pennsylvania (York Hospital) - Ganglioneuroblastoma (6)
Puerto Rico (University of Puerto Rico) - Ganglioneuroma/ganglioneuroblastoma
Rhode Island (RI Hospital Residents) - Ganglioneuroblastoma
Texas (Lubbock) - Ganglioneuroblastoma
Texas (Propath Associates) - Ganglioneuroma (2)
Texas (San Antonio) - Ganglioneuroblastoma
Texas (Scott & White Memorial Hospital) - Ganglioneuroblastoma
Wisconsin (Meriter Hospital) - Ganglioneuroma
Wyoming (Greenbrier Valley Medical Center) - Adrenal cortical neoplasm
Australia (North Queensland Pathology) - Ganglioneuroblastoma
Australia (Royal Prince Alfred Hospital) - Ganglioneuroblastoma, differentiating
Canada (Foothills Medical Center) - Ganglioneuroblastoma
Hong Kong (Hong Kong Baptist Hospital) - Neuroblastoma, stroma-rich
Italy (Naples) - Ganglioneuroblastoma
Saudi Arabia - Ganglioneuroma, maturing type

Case 5 - Diagnosis:

Neuroblastoma with therapy-associated maturation (ganglioneuroblastoma), adrenal
T-93000, M-94903

Case No. 6, Accession No. 29680

March 2004

Alameda (Alameda County Medical Center) - Adrenal cortical carcinoma
Arcadia (Garfield Medical Center) - Adrenal cortical carcinoma
Bakersfield - Adrenal cortical carcinoma
Baldwin Park (Kaiser Permanente) - Adrenocortical carcinoma (3)
Fontana (Kaiser Permanente) - Adrenal cortical carcinoma

Howard/Fremont - Adrenocortical tumor, probably malignant
Irvine (UC Irvine Residents) - Adrenal cortical carcinoma
Laguna Beach (South Coast Medical Center) - Neuroendocrine carcinoma vs. atypical carcinoid
Long Beach - Adrenocortical carcinoma (7)
Monterey (Community Hospital of Monterey Peninsula) - Adrenal cortical carcinoma (4)
Mountain View (El Camino Pathology Group) - Adrenocortical adenocarcinoma (2)
Sacramento (UC Davis Medical Center) - Adrenal cortical carcinoma
San Diego (Naval Medical Center) - Adrenal cortical carcinoma
San Francisco (San Francisco General Hospital) - Composite pheochromocytoma
Santa Barbara (Santa Barbara Cottage Hospital) - Adrenal cortical carcinoma
Santa Rosa (Santa Rosa Memorial Hospital) - Adrenal cortical carcinoma (1); Adrenocortical carcinoma (2)
Ventura - Adrenal cortical carcinoma
Alaska (Alaska Native Medical Center) - Adrenocortical carcinoma
Arizona (Maryvale Medical Center) - Adrenal cortical carcinoma
Colorado (Evergreen) - Adrenal cortical carcinoma
Colorado (Lutheran Medical Center) - Adrenal cortical carcinoma
Florida (Baptist Hospital) - Adrenal cortical carcinoma (5)
Florida (Ocala) - Cortical adenoma
Florida (Tallahassee) - Adrenal cortical carcinoma
Florida (Winter Haven Hospital) - Metastatic adenocarcinoma (1); Adenocarcinoma, metastatic (1)
Illinois (Burr Ridge) - Cortical carcinoma
Illinois (Evanston Hospital) - Adrenal cortical carcinoma
Indiana (Ball Memorial Hospital) - Adrenocortical adenoma
Indiana (Howard Community Hospital) - Adrenal adenoma, ? capsular penetration
Kansas (Kansas University Medical Center) - Adrenal corticocarcinoma (3)
Maryland (National Naval Medical Center) - Adrenal corticocarcinoma
Maryland (Johns Hopkins Hospital Residents) - Adrenal cortical neoplasm, favoring carcinoma
Massachusetts (Berkshire Medical Center) - Adrenocortical carcinoma
Massachusetts (New England Medical Center Residents) - Adrenal cortical carcinoma
Minnesota (Fairview Southdale Hospital) - Adrenal cortical carcinoma
New Jersey (Overlook Hospital) - Adrenal cortical carcinoma
New York (Long Island Jewish Medical Center) - Cortical adenoma
New York (Nassau University Medical Center) - Cortical carcinoma
New York, New York - Adrenocortical neoplasm, favor malignant vs. metastatic neuroendocrine carcinoma (would perform a synaptophysin) vs. adrenal corticomедullary tumor
New York (New York Presbyterian Cornell Residents) - Adrenal cortical carcinoma
North Carolina (Mountain Area Pathology) - Adrenocortical carcinoma (1); Adrenal cortical carcinoma (3)
Ohio (Medical College of Ohio) - Adenocortical carcinoma
Oklahoma (Tulsa) - Adrenal cortical adenoma
Pennsylvania (Allegheny General Hospital) - Adrenal cortical carcinoma
Pennsylvania (Conemaugh Memorial Medical Center) - Adrenocortical carcinoma
Pennsylvania (Drexel University College of Medicine) - Adrenal adenoma with hyperaldosteronism
Pennsylvania (Lehigh Valley Hospital) - Carcinoma, favor metastatic
Pennsylvania (Mount Nittany Medical Center) - Adrenal cortical carcinoma
Pennsylvania (York Hospital) - Adrenal cortical carcinoma (1); Adrenocortical carcinoma (5)
Puerto Rico (University of Puerto Rico) - Cortical adenocarcinoma
Rhode Island (RI Hospital Residents) - Adrenal cortical adenoma
Texas (Lubbock) - Adenoma
Texas (Propath Associates) - Aldosterone producing adrenocortical carcinoma (1); Adrenal cortical adenoma (1)
Texas (San Antonio) - Adrenal cortical carcinoma
Texas (Scott & White Memorial Hospital) - Adrenal cortical carcinoma
Wisconsin (Meriter Hospital) - Pheochromocytoma

Wyoming (Greenbrier Valley Medical Center) - Adrenal cortical carcinoma
Australia (North Queensland Pathology) - Adrenal cortical carcinoma
Australia (Royal Prince Alfred Hospital) - Adrenal cortical carcinoma
Canada (Foothills Medical Center) - Adrenal cortical carcinoma
Hong Kong (Hong Kong Baptist Hospital) - Adrenal cortical carcinoma
Italy (Naples) - Adrenal cortical carcinoma
Saudi Arabia - Adrenal cortical carcinoma, adrenal

Case 6 - Diagnosis:

Adrenal cortical carcinoma, adrenal
T-93020, M-83703

Consultation: Dr. Kempson, Stanford University: "Adrenal cortical carcinoma".
